
Provider: ASI Doors, Inc.

Course #: M-0819

Program: High Performance Doors - Safety,
Security & Increased Energy Efficiency

Length: 1 hour

Credits #: 1 AIA CES LU|HSW

HSW: Yes

Description: ASI Doors presents relevant high-performance door solutions with its industrial product line. This course includes discussion of product and details that uniquely describe the value of high performance doors. It also review specifications and design of, secured parking areas (residential, mixed-use, commercial and industrial) and controlled environments (commercial, industrial).

Learning Objectives: After completion of this course, participants will be able to:

- Gain an overview of products available and the applications and solutions
- Develop an understanding of how industrial doors compare to others on the market and discuss advantages and limitation of each type of technology
- Understand why and how technologies incorporated present a better solution
- Solution-specific details included real-world product application and modifications that can help in opening an area that requires high-performance doors

How Taught: The CES facilitator utilizes a PowerPoint presentation to provide an in-depth review high performance industrial doors. This course is an interactive session that encourages feedback and questions.

A/V Needs: Electrical power and screen for the PowerPoint slide presentation. The CES facilitator will supply the laptop.

Target Audience: Architects, specifiers, interior designers, owners and other design professionals. The ideal audience size can be 10-150 people. This program meets the needs of professionals at every experience level.

Cost: There is no cost to bring this program into your firm or chapter meeting.
